

NEW! WITH DALI-2 AND PLUG-AND-PLAY DETECTORS

### COMPACT SERIES: INNOVATIONS FOR FLEXIBLE LIGHT CONTROL. ESY!

### COMPACT PRESENCE AND MOTION DETECTORS

Every application. Every technology. One design.

PERFORMANCE FOR SIMPLICITY

ESYLUX GmbH & Co. KG | sales@esylux.com | www.esylux.com

### HIGH-PERFORMANCE DIVERSITY

### **EVERY INSTALLATION, EVERY TECHNOLOGY**

The COMPACT series offers not only a wide range of versions for a broad range of applications, but also impressive innovative concepts for the realisation of intelligent solutions for all building areas.

- Ceiling detectors: 360° detection angle, range Ø 8, Ø 24 or Ø 32 metres
- Wall-mounted detectors: 180° detection angle, range Ø 16 m
- 230 V, DIM 1 10 V, Universal Current (12 36 V AC/DC), DALI, DALI-2, KNX and ELC
- Surface mounting, recessed mounting or recessed ceiling mounting
- Switching, dimming and HVAC
- Variants with pre-assembled connection cables for WAGO WINSTA\* and Wieland GST18\*
- Option of further functions such as acoustic sensor or touch function
- Radiation-free PIR sensors without electrosmog

### **ALWAYS READY**WITH THE RIGHT TOOL

### MOBILE PROJECT MANAGEMENT

The ESY-Pen and the ESY-App allow users to save, access and transfer configured projects:

- Each project can be saved with a unique name and description in the ESY-App
- No project is too big for the ESY-App: Up to 64 floors can be created, each with up to 64 rooms and up to 64 devices per room
- Within the ESY-App, a few clicks take the user from the project to the room of their choice where they can quickly identify, select and configure ESYLUX products
- Configured projects can be stored in the ESY-App or forwarded on to other users as necessary. Previously stored configurations can be easily transferred to products of the same type via the ESY-Pen using the cloning function
- The project documentation is integrated into a project report that can then be sent as a PDF document and also printed off as required

## UNIFORM DESIGN

### **FOR ALL APPLICATIONS**

### **APC AND BMS PRESENCE DETECTORS FOR DALI-2**

80

DALI-2-presence detectors from ESYLUX provide cross-room, decentralised lighting control without the need for a building management system, in addition to offering an extensive range of functions.

### TOUCH PRESENCE DETECTOR FOR KNX

10

The PD-C 180i/16 Touch KNX wall-mounted detector feature an impressive and innovative operating concept: Users can conveniently control and activate functions simply by lightly touching the surface of the lens.

### DUO DALI PRESENCE DETECTOR

12

DALI broadcast two-channel solution with presence and daylight dependent constant light control, manual override with conventional, 230 V button, two HVAC channels for optional DALI switch actuators.

### PRESENCE AND MOTION DETECTORS WITH WINSTA CONNECTIONS 14

The COMPACT presence and motion detectors with WINSTA pluggable connections from WAGO facilitate particularly fast installation via simple plug-and-play.

### PRESENCE AND MOTION DETECTORS FOR CORRIDORS

Specific applications require specific solutions. The Corridor detectors in the COMPACT series are the ideal solution for long corridors and aisles.

### PRESENCE DETECTORS FOR ESYLUX LIGHT CONTROL 18

ESYLUX Light Control lighting solutions use intelligent system sensors to ensure optimal lighting conditions and maximum energy efficiency – biologically effective light included!

SIMPLY EFFICIENT

## **AVOID UNNECESSARY ENERGY CONSUMPTION**

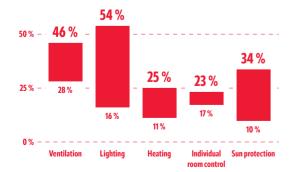

The principle of demand-driven automation is as easy as it sounds: Only use energy when it is really needed. It replicates typical human behaviour. Those working in office buildings and other workplaces often forget to switch off lighting, ventilation and heating systems when they leave a room. This results in far too much unnecessary energy consumption.

### SAVING ENERGY THROUGH INTELLIGENT SENSOR TECHNOLOGY

The use of a simple presence detector alone already results in a significant improvement. This is because it automatically ensures that the lighting or other devices are only switched on when people are actually in the workplace. The presence detector has a light sensor that checks the current brightness during operation. If the daylight that enters the room through the windows is adequate for work, the presence detector will also switch off the artificial light.

Even more energy can be saved by constantly adapting to current environmental conditions. Presence detectors with the ability to provide constant lighting control only dim up the artificial light to the extent necessary to achieve a set value, based on the available daylight. This is the best possible way of using daylight and also naturally ensures an extremely high level of convenience. It automatically ensures that rooms never become too dark or too bright!

### ENERGY SAVING POTENTIAL OF DEMAND-DRIVEN BUILDING AUTOMATION (MIN./MAX.)

# STAGING LIGHTIN G GROUPS

# APC AND BMS PRESENCE DETECTORS FOR THE DALI-2 INDUSTRY STANDARD

APC presence detectors from ESYLUX with integrated DALI-2 control unit and bus voltage supply control up to 64 luminaires in up to 16 lighting groups – decentralised, across rooms and without the need for a complex building management system. BMS presence detectors serve as supplementary input devices in the various room zones. This allows individual presence- and daylight-dependent lighting control in all areas.

### CONFIGURE A WIDE RANGE OF FUNCTIONS VIA SMARTPHONE

In addition, the APC presence detectors offer a wide range of functions for improved quality of life and building energy efficiency in offices, educational establishments and healthcare facilities. For example, they are able to use time functions, scenes or flexibly switch groups. It's simple to configure the system using the ESY-App and a smartphone!

Product group / product name*	Item no.

 $<sup>^\</sup>star$  Additional detector variants for DALI-2 can be found in the product overview on page 3

### Application example for flexible switching of groups in reversible rooms:

The room is divided by two mobile partitions, each connected to one of the APC's push button inputs. If wall 1 is opened up, the APC switches Groups 2 and 3 to be in the same group (Group 4). If the same happens with wall 2, e.g. for an event, the APC switches all luminaires in the room to the same group (Group 5). The push button functions also automatically adapt to the respective group scenario.

# INCLUDING SWIT CH FUNCTION

## TOUCH PRESENCE DETECTOR FOR KNX

What is most common for smartphones and tablets has now also reached the key area of demand-driven building automation – with the PD-C 180i/16 TOUCH KNX wall-mounted presence detector from ESYLUX. Their touch-sensitive lens surface allows convenient control of numerous functions – thereby replacing KNX touch sensor.

### TOUCH CONTROL WITH TWO DIFFERENT FUNCTIONS

The touch detectors react to two types of touch: short and longer. Both types of touch can be assigned to various KNX communication objects as required. The touch function can therefore be used not only to switch lights on or off or for dimming, but also for applications such as controlling a blind or selecting entire scenes!

An integrated touch function enables convenient manual control of numerous functions.

KNX	Touch presence detector	
Short touch		Freely assignable with numerous communication objects*
Long touch	<b></b>	Freely assignable with numerous communication objects*

<sup>\*</sup> Switching, dimming, selecting scenes, controlling blinds etc

# MULTI-CHANNEL SOLUTION

### THE DUO DALI PRESENCE DETECTOR

The DUO DALI presence detectors in the COMPACT series offer simple solutions for the intelligent control of lights in board rooms, classrooms and open-plan offices via DALI broadcast. Using passive infrared technology, they reliably detect when people are present in a room without producing any additional emissions. The presence and daylight dependent constant light control provides the highest level of energy efficiency while maintaining a consistent brightness level. The detectors are connected to the 230 V mains and have two integrated DALI secondary power supplies, which can power two sets of up to 25 DALI lights. Two inputs for conventional 230 V buttons allow the automatic control of the lights to be manually overridden (ON/OFF, dimming).

### TWO LIGHT CHANNELS PLUS AN ADDITIONAL CHANNEL

DUO DALI presence detectors guarantee optimal lighting conditions and control the light for two room zones. Offsets are used to differentiate between the lighting of the room zones. In addition, there is the option to add DALI actuators that switch on and off presence dependent additional lighting (e.g. board light) or ventilation (HVAC). The actuators are equipped with a 10 A relay (potential-free) and can also be manually overridden (ON/OFF) using a 230 V button.

### Application example of a classroom:

The PD-C 360i/24 DUO DALI activates the lighting only when people are present and adjusts the brightness in two channels depending on the ambient lighting. Optional switch actuators can be added in order to control other consumers (screens, interactive boards, accent lighting, HVAC etc.). Lighting and actuators can be configured for fully automatic or semi-automatic operation.

# RANGE SPECIALISTS

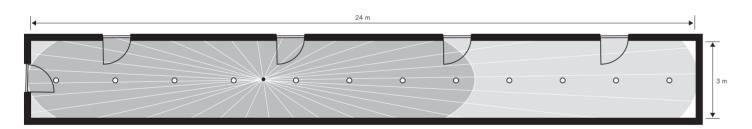

### PRESENCE AND MOTION DETECTORS FOR CORRIDORS AND AISLES

Demand-driven building automation solutions must occasionally be specially adjusted to accommodate particular features of an application. Presence detectors with an elliptical and far-reaching field of detection are ideal for mounting on ceilings in corridors or in long aisles – not least because they reduce the number of devices required.

### EXTENSIVE RANGE – INCLUDING MOVEMENTS DIRECTLY IN FRONT OF THE DETECTOR

With a total range of up to 32 m in diameter, the PD-C and MD-C 360i/32 Corridor presence and motion detectors from ESYLUX offer the ideal solution. Thanks to this extensive range, a single detector can be used to cover long corridors and turn the lighting on and off depending on presence, movement or daylight. In areas that require an even greater range, up to eight devices can be connected via parallel wiring!

# PLUG. SAVE. READY.

### PRESENCE AND MOTION DETECTORS WITH WAGO-WINSTA® CONNECTION

Time-saving solutions are becoming increasingly important for electricians, especially in times of high demand and a lack of skilled workers. This is why the COMPACT series also includes presence and motion detectors with WINSTA pluggable connections from WAGO – for greater energy efficiency via plug-and-play and installation that is both safe and trouble free.

### **ENERGY EFFICIENCY VIA PLUG-AND-PLAY**

The full potential of DUO DALI presence detectors with WINSTA connection can be seen in larger rooms that only have windows on one side. Thanks to an additional offset light channel, lights both close to and away from the window can be adjusted to better suit the different lighting conditions. A DALI actuator from ESYLUX also allows ventilation systems and panel lighting to be connected to the system and switched on and off depending on whether human presence can be detected

### Suggested planning with DUO DALI presence detectors

Driver Sets allow CELINE ceiling lights from ESYLUX and DUO DALI presence detectors with WINSTA connection to be easily combined via plug-and-play.

# SMART SYSTEM SEN SOR TECHNOLOGY

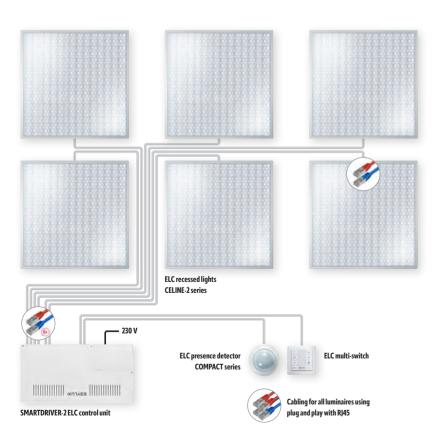

### PRESENCE DETECTORS FOR **ESYLUX LIGHT CONTROL ELC**

Whether as a preconfigured, ready-to-install set for standard rooms or an individual customisable solution: Our light systems with ESYLUX Light Control ELC combine the best light with the simplest installation and operation - whatever your budget! Ceiling lights, controlunits, as well as the PD-C 360i/8 and /24 ELC presence detectors, are connected to one another as system components using plug-and-play, and can be grouped for different room zones via simple plug connections.

### **ENERGY-EFFICIENT HUMAN CENTRIC LIGHTING VIA PLUG-AND-PLAY**

When in operation, the ELC system solutions create optimal lighting for workplaces. Due to the energy-efficient Human Centric Lighting (HCL) of the SymbiLogic technology, they promote lasting vitality, well-being, the ability to concentrate and a restful night's sleep. With automatic presence- and daylight-dependent switching and the adaptive HCL light control of SymbiLogic, energy consumption is kept to a minimum.

Product group / product name	Item no.

PD-C 360i/24 ELC (white, similar to RAL 9010)	EP10427619

The SMARTDRIVER-2 control unit contains the power supply for the system luminaires and the system sensors, which is why they can be connected easily using plug and play.

### **LIGHTING SYSTEMS WITH ESYLUX LIGHT CONTROL ELC:**

time savings due to fewer 230 V plug and play using SELV

### YOUR ADVANTAGES AT A GLANCE

- · Intelligent sensor system for light systems with ESYLUX
- Presence and daylight dependent adaptive HCL light control
- System integration via plug-and-play
- With ranges for all applications

- Automated lighting solutions with plug-and-play installation
- Ready for use immediately, with no programming required
- Energy-efficient Human Centric Lighting
- Freely configurable or as a ready-to-install set
- Simple, error-free grouping via plug connection
- For room-by-room modernisation in day-to-day operation
